Summary — Junior Software Developer with 1 year of experience in building scalable SaaS applications using React.js and JavaScript. Develops cross-platform mobile apps with Flutter, deploying to the Google Play Store. Designs backend systems with Node.js, Express, and DynamoDB, employing serverless architecture via AWS Lambda and API Gateway. Leverages S3, CloudFront, and EC2 to create secure, high-performance cloud solutions.

Experience

CloudMotivJan 2025 – Present

Jr. Software DeveloperPune, India

- Developed and maintained scalable SaaS applications with React.js and JavaScript, enhancing performance and ensuring responsive UI design
- Designed and implemented RESTful APIs with Node.js and Express.js, facilitating seamless integration for web and mobile applications
- Implemented serverless backend architectures with AWS Lambda and API Gateway, enabling scalable and cost-efficient services
- Built cross-platform mobile applications using Flutter and successfully deployed apps on the Google Play Store

Level Up TechnologiesJun 2024 – Sep 2024

Software Development InternBopal (Online)

- Contributed to frontend development at a fast-growing IT company providing software, website, and application development solutions globally
- Worked as a Frontend Developer using React, HTML, CSS, Tailwind CSS, and JavaScript
- Certificate: drive.google.com/file/d/1B5DeSUW5onOlob10vACkuf61KJ3IVjU_/view

Projects

RICEW ERP System

React.js, AWS, Node.js, Express.js

- Engineered a responsive and accessible UI with React 18 and Material UI, ensuring consistent design across all modules
- Built a Bulk Management Module using ExcelJS and XLSX for mass upload and validation of RICEW requirements and resource rosters
- Developed a Cost Estimation Model and Rate Card Generator for real-time effort, resourcing, and budget projections

VOIZ – Indian Regional Music Platform

React.js, Flutter, AWS, Node.js, Express.js

- Designed and implemented a clean, intuitive player UI in React.js for seamless music browsing and streaming
- Built and maintained RESTful APIs on AWS Lambda for secure, efficient data access to the frontend
- Engineered low-latency endpoints for audio streaming, user data management, and real-time interactions on AWS

Ecomotiv – Environmental Conservation Platform

React.js, JavaScript, Tailwind CSS, AWS, Node.js, Express.js

- Built a platform connecting corporations with farmers to facilitate tree plantation on registered land
- Developed responsive, scalable frontend components using React.js and Tailwind CSS for an optimized user experience
- Engineered media storage with AWS S3 and CloudFront for fast, secure delivery of photos, videos, and files

Skills

Languages Java, JavaScript

Frameworks React.js, Express.js, Flutter, Tailwind CSS

Architecture RESTful API Design, Microservices

Runtime Node.js

Databases MySQL

Education

D.G. Ruparel CollegeJun 2022 – Apr 2024

Master of Science in Computer ScienceMumbai

Kirti M. Doongursee CollegeJun 2019 – Apr 2022

Bachelor of Science in Computer ScienceMumbai
